## Contents

| 1 | Getting Started                       | 7  |
|---|---------------------------------------|----|
|   | Setting Up Your Machine               | 7  |
|   | How Web Browser Works                 | Ć  |
|   | Checking Web Page Errors              | 10 |
|   | Files and Folders                     | 10 |
|   | Creating a HTML Page                  | 11 |
|   | Styling HTML with CSS                 |    |
|   | Combining HTML with JavaScript        | 15 |
|   | Document Object Model                 | 15 |
|   | Changing HTML DOM with JavaScript     | 15 |
|   | Debugging JavaScript                  | 17 |
|   | How Computers Work                    | 18 |
|   | Data, Bits, Bytes and Gigabytes       | 19 |
|   | Information                           | 20 |
|   | On Your Own                           | 21 |
|   |                                       |    |
| 2 | Programming with JavaScript           | 23 |
|   | JavaScript Basics                     | 23 |
|   | Variables                             | 24 |
|   | Numbers                               | 24 |
|   | Strings                               | 26 |
|   | Booleans                              | 28 |
|   | Comments, Statements and Expressions  | 28 |
|   | Statement Blocks                      | 29 |
|   | Handling Errors                       | 30 |
|   | Conditionals                          | 31 |
|   | Boolean Operators                     | 32 |
|   | Example: FizzBuzz                     | 34 |
|   | Nullish Operators                     | 34 |
|   | Grouping Statements with Functions    | 35 |
|   | Example: Linear Interpolation         | 38 |
|   | Example: Factorial                    | 40 |
|   | Example: Fibonacci                    | 41 |
|   | Loops and Computational Complexity    | 41 |
|   | Example: Integer Base                 | 44 |
|   | Generators                            | 46 |
|   | Example: Fibonacci Sequence Generator | 47 |
|   | Example: Range Sequence Generator     | 48 |
|   | Organizing Code with Modules          |    |

## Contents

|   | Complex Types                        | <br>  | <br> |       |       |   |   |   |   | . 50  |
|---|--------------------------------------|-------|------|-------|-------|---|---|---|---|-------|
|   | Arrays                               | <br>  | <br> |       |       |   |   |   |   | . 50  |
|   | Example: Using Array as Stack        | <br>  | <br> |       |       |   |   |   |   | . 51  |
|   | Multi-Dimensional Arrays             |       |      |       |       |   |   |   |   |       |
|   | Example: Siamese Magic Squares       |       |      |       |       |   |   |   |   |       |
|   | Example: Sorting                     |       |      |       |       |   |   |   |   |       |
|   | Array.sort()                         |       |      |       |       |   |   |   |   |       |
|   | Insertion Sort                       |       |      |       |       |   |   |   |   |       |
|   | Quick Sort                           |       |      |       |       |   |   |   |   |       |
|   | Merge Sort                           |       |      |       |       |   |   |   |   |       |
|   | Binary Search                        |       |      |       |       |   |   |   |   |       |
|   | Destructuring Values                 |       |      |       |       |   |   |   |   |       |
|   | Example: Reverse Array In Place      |       |      |       |       |   |   |   |   |       |
|   | Looping with Array Functions         |       |      |       |       |   |   |   |   |       |
|   | Map and Set                          |       |      |       |       |   |   |   |   |       |
|   | -                                    |       |      |       |       |   |   |   |   |       |
|   | Example: Document Search             |       |      |       |       |   |   |   |   |       |
|   | Random Numbers                       |       |      |       |       |   |   |   |   |       |
|   | Example: Normally Distributed Random |       |      |       |       |   |   |   |   |       |
|   | Dates                                |       |      |       |       |   |   |   |   |       |
|   | Example: Month Calendar              |       |      |       |       |   |   |   |   |       |
|   | Regular Expressions                  |       |      |       |       |   |   |   |   |       |
|   | Custom Types                         |       |      |       |       |   |   |   |   |       |
|   | Object Literals                      |       |      |       |       |   |   |   |   |       |
|   | Class Templates                      |       |      |       |       |   |   |   |   |       |
|   | Destructuring Objects                |       |      |       |       |   |   |   |   |       |
|   | Type Inheritance                     | <br>  | <br> |       |       |   |   |   |   |       |
|   | Example: Fractions                   | <br>  | <br> |       |       |   |   |   |   | . 92  |
|   | GCD and LCM $\dots$                  | <br>  | <br> |       |       |   |   |   |   | . 96  |
|   | Finishing the Fraction Class         | <br>  | <br> |       |       |   |   |   |   | . 97  |
|   | On Your Own                          | <br>  | <br> |       |       |   |   |   |   | . 99  |
|   | Puzzles                              | <br>  | <br> |       |       |   |   |   |   | . 99  |
|   | Solutions to Puzzles                 | <br>  | <br> |       |       |   |   |   |   | . 100 |
|   |                                      |       |      |       |       |   |   |   |   |       |
| 3 | Interacting with Browser             |       |      |       |       |   |   |   |   | 103   |
|   | 2D Graphics Primer                   |       |      |       |       |   |   |   |   |       |
|   | Example: Motion Animation            | <br>  | <br> |       |       |   |   |   |   | . 103 |
|   | Example: Hit Game                    | <br>  | <br> |       |       |   |   |   |   | . 107 |
|   | Example: Monte Carlo Simulation      | <br>  | <br> |       |       |   |   |   |   | . 119 |
|   | Handling DOM                         | <br>  | <br> |       |       |   |   |   |   | 122   |
|   | Using DOM Events                     | <br>  | <br> |       |       |   |   |   |   | . 122 |
|   | DOM Nodes                            | <br>  | <br> |       |       |   |   |   |   | . 123 |
|   | Accessing a Single DOM Node          | <br>  | <br> |       |       |   |   |   |   | . 124 |
|   | Accessing Several DOM Nodes          |       |      |       |       |   |   |   |   |       |
|   | Accessing and Modifying the DOM Tree |       |      |       |       |   |   |   |   |       |
|   | Example: Tree Search                 |       |      |       |       |   |   |   |   |       |
|   | Depth-First Search                   |       |      |       |       |   |   |   |   |       |
|   | Breadth-First Search                 |       |      |       |       |   |   |   |   |       |
|   | Using DFS With DOM                   |       |      |       |       |   |   |   |   |       |
|   |                                      | <br>- | <br> | <br>- | <br>- | • | - | - | • |       |

|   | Example: Maze Solver              |   |   |   |       | <br> |   |       |       |   | <br>  |   |   | . 136 |
|---|-----------------------------------|---|---|---|-------|------|---|-------|-------|---|-------|---|---|-------|
|   | Maze Solver Tutorial              |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Maze Solver Interface             |   |   |   |       | <br> |   |       |       |   | <br>  |   |   | . 137 |
|   | Maze Solver Code                  |   |   |   |       | <br> |   |       |       |   | <br>  |   |   | . 139 |
|   | Maze Solver Details               |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Client Side Routing               |   |   |   |       | <br> |   |       |       |   | <br>  |   |   | . 149 |
|   | SPA Components                    |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | SPA Client Router                 |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Fetch and Async Await             |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Promises                          |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Implementing the Router           |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Web Workers                       |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | The Web Workers Pool              |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Encrypting Data in Browser        |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | On Your Own                       |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   |                                   |   |   |   |       |      |   |       |       |   |       |   |   |       |
| 4 | Combining Client and Server       |   |   |   |       |      |   |       |       |   |       |   |   | 167   |
|   | Getting Started with Node.js      |   |   |   |       | <br> |   |       |       |   | <br>  |   |   | . 167 |
|   | Installing Node.js                |   |   |   |       | <br> |   |       |       |   |       |   |   | . 167 |
|   | Node and NPM                      |   |   |   |       | <br> |   |       |       |   |       |   |   | . 168 |
|   | Example: Node.js Starter Project  |   |   |   |       | <br> |   |       |       |   |       |   |   | . 168 |
|   | Example: Node.js Http Server      |   |   |   |       | <br> |   |       |       |   |       |   |   | . 170 |
|   | Example: Data Storage             |   |   |   |       | <br> |   |       |       |   |       |   |   | . 175 |
|   | Example: Topological Sorting      |   |   |   |       | <br> |   |       |       |   |       |   |   | . 182 |
|   | Example: Listing Tasks in Browser |   |   |   |       | <br> |   |       |       |   |       |   |   | . 189 |
|   | Example: Creating a New Task      |   |   |   |       | <br> |   |       |       |   |       |   |   | . 193 |
|   | On Your Own                       |   |   |   |       | <br> |   |       |       |   | <br>  |   |   | . 195 |
| _ |                                   |   |   |   |       |      |   |       |       |   |       |   |   | 40-   |
| 5 | Learning from Data                |   |   |   |       |      |   |       |       |   |       |   |   | 197   |
|   | Neural Networks                   |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Computing Outputs                 |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Example: XOR and Sinus            |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Learning via Back Propagation     |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Scalable Vector Graphics          |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Example: Color Matching           |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Learning via Genetic Algorithm    |   |   |   |       |      |   |       |       |   |       |   |   |       |
|   | Example: Board of Robots          |   |   |   |       |      |   |       |       |   |       |   |   |       |
